Professional Summary

Senior Backend Engineer with over 4 years of experience designing scalable microservices and event-driven architectures. Proficient in Python (Django, FastAPI) with growing expertise in Go and cloud-native technologies including AWS (Lambda, S3) and Kubernetes. Proven track record of optimizing high-traffic systems and implementing container orchestration strategies to enhance deployment efficiency.

Technical Skills

Languages: Python, Go, JavaScript, SQL

Frameworks: FastAPI, Django, Flask, React

Tools: Kubernetes, Docker, AWS, Apache Kafka, PostgreSQL, Redis, Git

Professional Experience

TechSolutions Inc.

2021 - Present

Software Engineer

- Designed and implemented scalable RESTful microservices using Python and FastAPI, supporting high-traffic logistics operations.
- Deployed serverless functions using AWS Lambda and the Serverless framework, reducing infrastructure overhead by 30%.
- Managed containerized application deployments in a staging Kubernetes environment using kubectl to ensure high availability.
- Optimized database queries for PostgreSQL and implemented Redis caching strategies, reducing API response times by 40%.

StartUp Alpha

2019 - 2021

Junior Developer

- Assisted in architecting core application services using Flask and PostgreSQL.
- Integrated CI/CD pipelines using GitHub Actions to automate testing and deployment workflows.
- Collaborated with frontend teams to integrate APIs and ensure seamless data flow.

Projects

TaskMaster AI -- (Link)

- An AI-powered task management app leveraging event-driven design.
- Technologies:** Python, FastAPI, OpenAI API, Docker

Education

State University

2015 - 2019

B.S. Computer Science
